### JOB POSTING INFORMATION

#### Special Job Requirements

**Work Duration: 8 months** (An 8 month employment period is registered as 2 separate, consecutive work terms)

**Please ONLY apply if you are available for 8 months, and state your availability CLEARLY in your cover letter.**

**For Engineering Undergraduate Students:** Before applying to this posting, it is your responsibility to have completed the appropriate pre-requisite courses for this length of work term, and to understand how this length of work term affects your academics. If this means you will be registered in a 5th or higher work term, the full co-op tuition fee (equal to two installments) will be charged for each additional work term above the mandatory four. See links below for more details.

- Engineering Tuition, installments – includes the statement *Students who opt to complete extra work terms outside of the Co-op fee installment structure should refer to "Undergraduate Tuition—Co-op program, per work term"*.

**Job Title** Full Stack Developer Co-op  
**Job Location** Remote  
**Region** N/A  
**Number of Positions** 3  
**Work Abroad** No

#### Job Description

##### Description

Hey, we're Article. We're a digital-first furniture brand that's working to make everyday living better by providing an easy way for people to furnish their space. We don't have brick and mortar stores, so we're able to deliver better value on beautiful, modern furniture. Recently named one of Canada's fastest growing companies for the second year in a row, we're on the hunt for talented, enthusiastic team members to join us at our headquarters in beautiful Vancouver, British Columbia.

We're looking for a Full Stack Engineer Co-op to create best in class user experiences for our applications. You'll be participating in all areas of the software development lifecycle from building solutions for our web storefront and internal supply chain applications

to building test automation suites. The Full Stack Software Engineer Co-op is an essential contribution to the Article team.

**Responsibilities:**

- Developing and implementing new features and enhancements for our website <https://www.article.com> and/or internal applications
- Covering the code with automated tests to detect regression and bugs
- Writing code in Java, CSS, and JavaScript for large-scale applications
- Support, maintain, and enhance all test case automation related activities during iterative development, system testing, and regression testing
- Integrating front- end applications with our Java stack
- Help and support in building applications that are responsive, performant, and accessible
- Participating in all areas of the software development lifecycle

**Qualifications****Requirements**

- Currently working towards a Bachelor's or Master's degree in Computer Science or a related field
- We are primarily a Java shop, so experience/knowledge of Java is a must have
- Experience/knowledge of JavaScript, CSS, and SASS
- Experience with modern front-end JavaScript framework (e.g. Vue, Angular, etc)
- Ability to write maintainable JavaScript components
- Familiar with front-end build systems (e.g. Webpack) and package management (e.g. npm)
- Design, create, and execute automation scripts using Cypress, Junit, and Jest
- Review manual test cases for the relevant application and provide feedback on suitability for automation to the project team
- Create and maintain test plans, cases, scenarios\_sanitized\_s, in compliance with defined QA standards and methodologies
- Establish and configure testing environments for executing test cases and scenarios
- Self-motivated with strong teamwork and communication skills
- Able to work in a fast-paced environment

**Benefits**

We want Article to be an amazing place to work, and we do our part to take care of our team. In addition to a competitive salary, we provide:

- A team-oriented work environment. Article is lucky to employ a wide range of experts, and seeks to facilitate a culture of mentorship and curiosity. We take on the job learning seriously, and we have a lot of fun doing it.
- Most HQ staff are currently working from home due to COVID-19, and we plan to return to our beautiful office as soon as it is safe for everyone to do so. The Article space is housed in a converted warehouse with in-house photo studios, an airy open layout, an open kitchen filled with snacks, and a variety of ice cream choices just up the street.
- A dog-friendly office. We love our dog friends here at Article. If you have a well-behaved, well-socialized pup, we'd love to have them in the office too.
- The tools you need to get your job done well! We supply state-of-the-art laptops and the software you need to succeed.
- Access to a benefits package with all the bells and whistles
- Onsite fitness equipment, change rooms (including towel service!) and bike storage
- Discounts on our products so you can style your home how you like it
- Regular extra-curricular activities, such as socials, open-mics, picnics... even cross-country skiing! We're open to suggestions for fun new activities so bring a few ideas along.

Ready to become a Particle? Apply today. We're excited to meet you.

**For relevant employers as defined by the BC Criminal Review Act: Will this position require a co-op student to complete a Criminal Records check?**

No

**Minimum Academic Year Completed** 1

**Minimum Work terms Completed** 0

**Are there any restrictions that would hinder hiring of non-Canadian students with a valid work permit?** No
